Getting the water chemistry right

Just like people, pools need balance. In pool-speak, balancing means getting the alkalinity and pH of the water right, so that protective chemicals, like chlorine, can work effectively. Also, when the water balance is in harmony with the human body it keeps the water pleasant, prevents eye and skin irritations, and prevents corrosion to pool surfaces and equipment.

Your pool, your family

The Australian backyard pool has the magical ability to bring family and friends together to enjoy a fun and healthy lifestyle. However, it also requires ongoing monitoring of the water chemistry, which until now, was easier said than done. Whilst test strips are the most commonly used means by which pool owners measure water chemistry, they have two key weaknesses: they don't tell us which chemicals to use and in what quantities to add them to the water.

The solution: Zodiac TWIST & DOSE

At Zodiac, we believe that pool health should be made easy. Hence we developed Zodiac **TWIST & DOSE**, so you can give your loved ones the safe and healthy swimming environment they deserve.

Zodiac **TWIST & DOSE** is an innovative system designed to help maintain a healthy and sparkling pool, in between pool shop visits. **TWIST & DOSE** takes the guess work out of pool chemical dosing, saving you time and money.

Twisting by the pool

The patented device called the TWIST is the key component. It is a simple to use, yet intelligent, test strip reading device that tells you which chemicals to use and in which quantities to keep your pool healthy and balanced. Simple to use, easy to understand, **TWIST & DOSE** is pool health made easy.

The kit includes...

3 in 1 Test Strips (25 x pieces)

Twist Device

Measuring Jug and Scoop for balance chemicals (Zodiac Alkalinity Up, Zodiac pH Up, Zodiac pH Down)

Measuring Jug and Scoop for purifier (Zodiac Pool Sparkle Purifier Chlorine)

Select the right TWIST & DOSE kit

Different kits are available for specific pool sizes. If your pool is between sizes then select the larger kit. ie for a 35,000L pool you should select the **TWIST & DOSE** medium kit.

Look for the kit size indicated on the front of the pack.

Ensure your pool is balanced and healthy with Zodiac TWIST & DOSE chemicals

Hint: It is easy to identify the range of Zodiac **TWIST & DOSE** chemicals! Just look for this **TWIST & DOSE** logo on the packs below.

Zodiac Alkalinity Up

Prescribed by the TWIST top yellow ring when Total Alkalinity (TA) levels are below 80 ppm. Maintain TA between 80-150ppm to stabilise pH levels. It is the first step in balancing your pool. Available in 2kg, 4kg and 10kg.

Zodiac pH Down

Prescribed by the TWIST top yellow ring when Total Alkalinity (TA) is above 150 ppm and/or by TWIST middle yellow ring when pH level is above 7.8. Getting the pH balance right, between 7.2 and 7.8, not only enhances bather's comfort but also prepares your pool for chlorine to work effectively. Available in 3kg and 6kg.

Zodiac pH Up

Zodiac pH Up is the other chemical than can be prescribed by TWIST middle yellow ring to increase pH levels when they are below 7.2. Available in 2kg

Zodiac Pool Sparkle Purifier

With the water now balanced, the TWIST bottom yellow ring prescribes perfect amount of Zodiac Sparkle Purifier to achieve optimum protection against bacteria and other nasties without over chlorinating the water. Includes stabilizer (sunscreen) for long lasting protection and built-in water conditioner for improved bather comfort. Available in 2kg, 4kg and 10kg.
